PROFESSIONAL SUMMARY

Computer Science undergraduate who enjoys building practical AI applications with Python. I have worked with Flask, machine learning models, **APIs**, **NLP**, and **LLM-based** applications, and have also contributed to **open-source projects** through GitHub.

TECHNICAL SKILLS

- **Languages:** Python , SQL (MySQL)
- **AI/Machine Learning:** Scikit-learn, Random Forest, XGBoost, Sentiment Analysis, Explainable AI .
- **NLP & Generative AI:** Gemini API , Prompt Engineering, Speech-to-Text/Text-to-Speech
- **Web Frameworks & Tools:** Flask, Streamlit, Git, GitHub, Vscode.
- **Data Analysis & Visualization:** Pandas, Numpy, Matplotlib, PowerBI.

PROJECTS

InvestIQ – AI Financial Intelligence & Portfolio Advisor

Python | Flask | Scikit-learn | XGBoost | Gemini API

- Built a Flask backend for a **financial recommendation** application.
- Used **XGBoost** to classify user risk profiles and **Random Forest** for portfolio recommendations.
- Added explanations for recommendations so users could understand why an option was suggested.
- Integrated **sentiment analysis** and Gemini API into the application.

EduVoice NLP – Voice-Enabled Learning Assistant

- Python | Flask | Gemini API | Speech Recognition
- Developed a **Generative AI chatbot** built on **Flask** to help students master complex academic concepts through interactive dialogue.
- Integrated **Voice-to-Voice** capabilities, allowing for seamless real-time speech interaction and audio AI responses.

ACHIEVEMENTS & COMPETITIONS

- **Top 1% Contributor-** Girl Script Summer of Code(GSSoc): Ranked among the top 1% of 42k+ contributors through **open-source** contributions, **pull requests** and collaborative developments
- **National Ideathon Finalist:** Ranked in the **Top 20 out of 900+** registrations for a Business Model-focused AI solution.
- **Project Expo Winner:** Secured **3rd Prize** at the National Students Meet for the development of InvestIQ.
- Hackathon Innovator: Developed AI-driven solutions for the **Healthcare** and **Business sectors** in competitive environments.

Smartly Labs - AI Agent Contributor | 2026

Hybrid Track

- Built and experimented with **11 AI agents** for different use cases on the Smartly Labs platform.
- Worked on agent workflows and iterated on agent outputs through testing.
- Achieved **#61 global rank and #1 city rank** on the contributor platform.

EDUCATION & CERTIFICATIONS

B.Tech - Computer Science | QIS College of Engineering & Technology | 2024–Present

Python Bootcamp with AI | CodeFobe | 2025

AI Primer Certification | Infosys Springboard | 2026

AI-ML Virtual Internship | EduSkills & Google Developers|2026
